$$3 \cdot a + 3 \cdot b$$

$$x \cdot y + x \cdot z$$

$$5 \cdot -y + 5 \cdot 4$$

Directions:

1. Game can have up to 4 players.
2. Player will draw a card. He/she will look for the match to the card drawn on the playing board. Key: the Distributive Law must be applied to find the match.
3. Player covers the match with his/her color.
4. Card is discarded in the discard pile.
5. Second player repeats steps 1-3.
